

**Laidig Systems, Inc.**  
Bulk Storage and Reclaim Systems

**SETTING THE STANDARDS  
WITH INNOVATIVE  
BULK STORAGE AND RECLAIM TECHNOLOGY**

Working with hard-to-handle materials?  
Need continuous, reliable delivery?  
Are confined-space concerns an issue?

Need high-volume storage or high delivery rates?  
Looking for ways to reduce labor costs?  
Is first-in-first-out inventory control of value?

**CUSTOM ENGINEERED FOR EXTREME CHALLENGES**

# LEADING THE INDUSTRY FOR OVER 40 YEARS

Laidig's custom-engineered bulk storage and reclaim systems offer proven performance and reliability that is second to none. Known throughout the industry for their rugged, high-quality systems, Laidig excels in innovative, effective designs to store and reclaim materials with special handling requirements. A wide range of storage and reclaim systems are available, offering storage of up to 3,000,000 CF with reclaim delivery rates as high as 1000 CFM. Laidig's high performance reclaim systems are integrated in steel or concrete vertical silos, dome storage structures or flat storage warehouses. All storage structures are specifically designed to accommodate the dynamic-load requirements unique to Laidig's bottom reclaimers.

up to 44' dia.

## Cone-Bottom Silo Reclaim Systems

3445, 4300, 5300, 8300, 9300 Series

Cone-bottom storage and reclaim systems are ideal for materials with moderate flow characteristics, such as dry meals, chemicals, plastics, and small wood waste. Standard systems are typically available with 30, 45, or 60 degree hoppers in bolted or welded steel tanks or in corrugated bins.

## Cantilever Silo Reclaim Systems

143, 243, 533, 543, 633, 643 Series

The cantilever storage and reclaim systems are designed to accommodate a wide range of material applications in flat-bottom vertical storage structures up to 44' in diameter. Standard systems are designed with bolted steel tanks or, optionally, with concrete silos. For lighter applications corrugated bin systems are also available.

up to 44' dia.

up to 72' dia.

## Track-Driven Silo Reclaim Systems

298, 698, 1098 Series

These heavy-duty, track-driven systems are designed for continuous operation under the most challenging conditions. When higher-volume delivery is required, or when handling materials with poor flow characteristics, track-driven reclaim systems are often the best solution. Storage structures for this series range from 15' to 72' in diameter, and are available in standard bolted steel tanks or, optionally, in monolithic concrete silos.

**LET LAIDIG SOLVE YOUR BULK STORAGE AND RECLAIM CHALLENGES.**

# LEADING THE INDUSTRY FOR OVER 40 YEARS

up to 130' dia.

## Wheel-Supported Silo Reclaim Systems

CS210, CS310, CS510 Series

For high-volume storage of free-flowing materials such as dry grains and plastic pellets, the Laidig *CLEANSWEEP*<sup>™</sup> offers a storage and reclaim system with multiple draw downs in the floor and a wheel-supported reclaimer that provides total clean out without the need for personnel entry into the silo. *CLEANSWEEP*<sup>™</sup> systems are available in corrugated bins and in welded steel or monolithic concrete silos.

## Dome and Super-Silo Reclaim Systems

2098, 2198, 3098 Series

Based on Laidig's 40 years of unequalled experience in track-driven reclaim systems, the 2098 and 2198 *DOMINATOR*<sup>™</sup> and the 3098 *RADIAL X-TRAKTOR*<sup>™</sup> combine the next-generation automated high-delivery reclaimer with the latest technology dome and super-silo storage. These storage and reclaim systems provide cost-effective solutions for high-volume applications, providing up to 1,500,000 CF storage with continuous reclaim rates as high as 500 CFM.

up to 150' dia.

up to 140' wide

## Traversing-Screw Reclaim Systems

9100 *LINEAR X-TRAKTOR*<sup>™</sup> Series

The *LINEAR X-TRAKTOR*<sup>™</sup> offers ultra-high-volume flat storage (up to 3,000,000 CF) with extremely-high delivery rates (1000 CFM, continuous). These systems are designed with state-of-the-art storage and reclaim technology for the most demanding material applications. The *LINEAR X-TRAKTOR*<sup>™</sup> takes full advantage of economies of scale to offer competitive cost per ton storage and reclaim.

Laidig has pioneered the bulk storage and reclaim industry for over 40 years, and is recognized as the industry leader in bottom reclaiming. Laidig engineers, markets, constructs, and services their bulk storage and reclaim systems. Decades of experience in developing innovative and effective designs has enabled Laidig to expand with confidence into the unique material handling applications of the 21<sup>st</sup> Century. Laidig's highly-qualified team has the knowledge and expertise necessary to provide solutions for some of the most difficult bulk material handling challenges.

**LET LAIDIG SOLVE YOUR BULK STORAGE AND RECLAIM CHALLENGES.**

# WHEN PERFORMANCE IS CRUCIAL, DEPEND ON LAIDIG.

**WE DELIVER... GUARANTEED.**

## Laidig's Formula for Success...

Today, over four decades later, Laidig's pioneering efforts, combined with the Laidig formula of innovation, quality, commitment, and relentless drive, continue to meet with success. Laidig Systems, Inc. is now recognized as an industry leader in bulk storage and reclaim. Thousands of bulk storage and reclaim systems are installed worldwide. New system designs are continuously introduced to keep pace with the challenges of the 21<sup>st</sup> Century. Laidig is proud to be setting the standards of the bulk storage and reclaim industry.

When Jon Laidig built his first bottom reclaimer in 1961, the storage market was searching for a more reliable and rugged reclaim system. Jon's interest and ability in engineering, coupled with his strong commitment and relentless drive to develop a high-quality, cost-effective reclaimer, soon resulted in the realization of an innovative, efficient reclaim system. With that initial success, Jon founded Laidig, Inc. in 1964.

*"If we design and install your storage and reclaim system, we guarantee it will work."*

*Wyn Laidig, President*
